

**Project Design Phase-II**  
**Solution Requirements (Functional & Non-functional)**

|               |                                                                                    |
|---------------|------------------------------------------------------------------------------------|
| Date          | 23 February 2026                                                                   |
| Team ID       | LTVIP2026TMIDS55764                                                                |
| Project Name  | Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau |
| Maximum Marks | 4 Marks                                                                            |

**Functional Requirements:**

| FR No. | Non-Functional Requirement | Description |
|--------|----------------------------|-------------|
|--------|----------------------------|-------------|

|       |                  |                                                                                                     |
|-------|------------------|-----------------------------------------------------------------------------------------------------|
| NFR-1 | <b>Usability</b> | The Tableau dashboard should be easy to use, userfriendly, and allow users to easily understand the |
|-------|------------------|-----------------------------------------------------------------------------------------------------|

|  |  |                                                                              |
|--|--|------------------------------------------------------------------------------|
|  |  | analysis of UNESCO World Heritage Sites through interactive charts and maps. |
|--|--|------------------------------------------------------------------------------|

|       |                 |                                                                                                                             |
|-------|-----------------|-----------------------------------------------------------------------------------------------------------------------------|
| NFR-2 | <b>Security</b> | The heritage dataset and Tableau workbook should be securely stored and protected from unauthorized access or modification. |
|-------|-----------------|-----------------------------------------------------------------------------------------------------------------------------|

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)                                                                                                                             |
|--------|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-1   | User Registration             | Registration through Form<br>Registration through Gmail<br>Registration through LinkedIn                                                                       |
| FR-2   | User Confirmation             | Confirmation via Email<br>Confirmation via OTP                                                                                                                 |
| FR-3   | Data Visualization            | Create maps showing heritage site locations<br>Create bar charts based on country and category<br>Create pie charts showing cultural, natural, and mixed sites |
| FR-4   | Dashboard Creation            | Design interactive Tableau dashboard<br>Add filters for country, region, and category<br>Enable user interaction and analysis                                  |
|        |                               |                                                                                                                                                                |
|        |                               |                                                                                                                                                                |

#### **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

|       |                     |                                                                                                                                       |
|-------|---------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| NFR-3 | <b>Reliability</b>  | The system should provide accurate, consistent, and dependable visualizations based on the UNESCO dataset without errors.             |
| NFR-4 | <b>Performance</b>  | The Tableau dashboard should load quickly and display visualizations efficiently even when working with large heritage site datasets. |
| NFR-5 | <b>Availability</b> | The Tableau dashboard and project files should be available whenever required for analysis, presentation, and decision-making.        |
| NFR-6 | <b>Scalability</b>  | The system should be able to handle additional UNESCO heritage site data in the future without affecting performance.                 |
