

Project Design Phase-I
Proposed Solution Template

Date	23 February 2026
Team ID	LTVIP2026TMIDS55764
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Many people lack structured, interactive, and data-driven insights into UNESCO World Heritage Sites worldwide. Information is often scattered across reports and websites, making it difficult to analyze patterns such as geographical distribution, site categories (Cultural/Natural/Mixed), endangered status, and country-wise representation. There is a need for a comprehensive visual analytics solution to explore and understand global heritage data effectively.

2.	Idea / Solution description	The project proposes an interactive Tableau dashboard that analyzes UNESCO World Heritage Sites data. The solution includes: • Visualization of sites by country and continent (map-based analysis) • Category-wise distribution (Cultural, Natural, Mixed) • Year-wise trends of site inscriptions
3.	Novelty / Uniqueness	• Combines geographic, historical, and categorical analysis in one interactive platform • Uses dynamic filters and storytelling features in Tableau
		□ Provides comparative country-level insights
4.	Social Impact / Customer Satisfaction	• Raises awareness about global cultural and natural heritage • Helps researchers and students analyze heritage trends • Supports tourism insights and policy level understanding

5.	Business Model (Revenue Model)	Possible revenue models include: • Subscription-based access to advanced dashboards • Licensing to educational institutions • Collaboration with tourism boards and travel companies
6.	Scalability of the Solution	Scalability of the Solution • Can be updated with new UNESCO site data annually • Expandable to include tourism statistics, visitor data, and revenue data • Can integrate predictive analytics (future heritage trends)
